

We are now taking it 3 steps further: -

Step 1 – HERCULES

As of 25th January 2016, we will be fitting all Elegance Sliding Patio Doors with the all new, **Hercules 'self-levelling triple roller system'** as standard. This allows the individual sash weight to be increased from 80Kg to 160Kg, improves the gliding motion and enables triple glazing when required.

Step 2 - VANGUARD

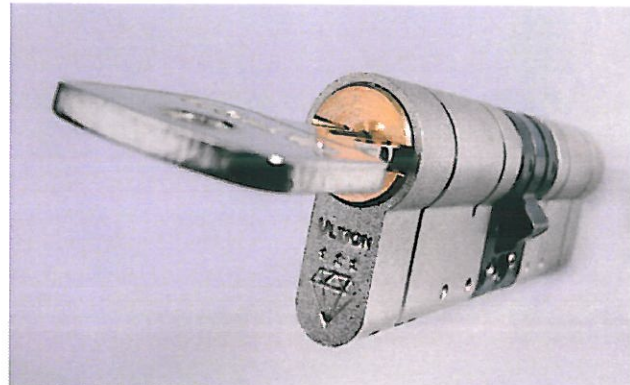

From the same date we will be fitting the exclusive to KAT, **Vanguard handle with 10 year guarantee as standard**. The Vanguard handle is available in 6 colour options from stock.

White; Anthracite Grey; Black: Chrome; Brushed Chrome; Gold

Step 3 - ULTION

A door does 2 principle jobs, keeps the weather out and keeps the bad guys out. As an industry we have done a great job of improving thermal credentials, yet until now not addressed another key factor; cylinder security. We introduce as standard the **ULTION** triple star, diamond rated lock cylinder with ultimate snap protection, molybdenum alloy core and lock down mode.

I hope you agree that these improvements to the Elegance Patio Door give you a patio door like no other. Price grids and updates can be found as usual on the KAT website, within the Trade section. If you need help with your log-in please contact us.

Many thanks for your business and continued support.

Yours sincerely

Chris Powell
Commercial Director
